1/-Cost-share on the same acreage no more than once per 5 years of the contract.

2/-Cost-sharing limited to perennial strips with at least 3 years life span.

3/-Cost-share on the same acreage no more than twice for 5 year contract; no more than three times for a 10 year contract.

4/-Mast producing hardwoods should be emphasized; longleaf (at <500 trees per acre) and South Florida slash (at <300 trees per acre) are the only pines that can be cost-shared. Pine planting plans must include, as a required item, some habitat manipulation (burning and disking, etc.) on a 1 to 4 year cycle after planting. This manipulation is needed to ensure development and maintenance of desired wildlife habitat.

5/-Cost-sharing plants limited to those on Species List Approved for Wildlife Plantings in Florida.

6/-Cost-sharing may also be allowed to modify existing tanks or troughs to allow wildlife watering. Contact NRCS State Biologist.
